

## INTERNATIONAL SEARCH REPORT

International application No.

PCT/JP03/05091

## A. CLASSIFICATION OF SUBJECT MATTER

Int.Cl<sup>7</sup> C01B31/12, H01G9/058

According to International Patent Classification (IPC) or to both national classification and IPC

## B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

Int.Cl<sup>7</sup> C01B31/12, H01G9/058

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Jitsuyo Shinan Koho	1926-1996	Toroku Jitsuyo Shinan Koho	1994-2003
Kokai Jitsuyo Shinan Koho	1971-2003	Jitsuyo Shinan Toroku Koho	1996-2003

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)

## C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category*	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
A Y	EP 1176617 A2 (KURARAY CO., LTD.), 30 January, 2002 (30.01.02), Par. No. [0035]; example 11 & JP 2002-104817 A Par. No. [0032]; example 11	1-37 46, 47
X Y A	JP 11-349320 A (Mitsubishi Chemical Corp.), 21 December, 1999 (21.12.99), Claims; Par. Nos. [0007] to [0014] (Family: none)	38-45 46, 47 1-37
A	JP 2002-043190 A (Kuraray Co., Ltd.), 08 February, 2002 (08.02.02), Full text (Family: none)	1-37

☐ Further documents are listed in the continuation of Box C.☐ See patent family annex.

\* Special categories of cited documents:  
"A" document defining the general state of the art which is not considered to be of particular relevance  
"E" earlier document but published on or after the international filing date  
"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)  
"O" document referring to an oral disclosure, use, exhibition or other means  
"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention  
"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone  
"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art  
"&" document member of the same patent family

Date of the actual completion of the international search  
15 July, 2003 (15.07.03)Date of mailing of the international search report  
29 July, 2003 (29.07.03)Name and mailing address of the ISA/  
Japanese Patent Office

Authorized officer

Facsimile No.

Telephone No.

# INTERNATIONAL SEARCH REPORT

International application No.

PCT/JP03/05091

## Box I Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet)

This international search report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1. ☐ Claims Nos.:

because they relate to subject matter not required to be searched by this Authority, namely:

2. ☐ Claims Nos.:

because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:

3. ☐ Claims Nos.:

because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

## Box II Observations where unity of invention is lacking (Continuation of item 3 of first sheet)

This International Searching Authority found multiple inventions in this international application, as follows:

The invention claimed in claims 1-27 is directed to carrying out the steps of mixing, granulation, dehydration and activation while maintaining a solid state through the steps.

The invention claimed in claims 38-47 is directed to forming a molding of carbon material and alkali metal activator before activation. (continued to extra sheet)

1. ☐ As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims.

2. ☒ As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.

3. ☐ As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.:

4. ☐ No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:

Remark on Protest ☐ The additional search fees were accompanied by the applicant's protest.

☐ No protest accompanied the payment of additional search fees.

Continuation of Box No.II of continuation of first sheet(1)

## &lt;Subject of search&gt;

Claim 30 comprehends a vast plurality of active carbons defined by the parameter "on Raman spectra obtained by measuring at 20 or more observation points, providing that the peak intensity of amorphous D band is 1, the standard deviation of relative intensities, to the peak intensity of amorphous D band, of respective peak intensities of graphite D band, amorphous G band and graphite G band is 0.05 or less". Although claim 30 comprehends all the active carbons with the defined properties, only minor portion of the active carbons claimed are disclosed in the description of this application within the meaning of PCT Article 5. Hence, the support within the meaning of PCT Article 6 is lacked. Further, as the above parameter cannot specify the scope of those having such characteristics even if the state of art at the time of filing of this application is taken into account, claim 30 also fails to satisfy the requirement of clarity within the meaning of PCT Article 6. Therefore, the search with respect to claims 30-37 has been limited to active carbons obtained by the process concretely set forth in the description of this application.
